Lab 6

一、

1. False，a derived class inherits all the members of class, except for the constructor—each class provides its own constructors that are specific to the class.
2. False，The is-a relationship represents inheritance. In an is-a relationship, an object of a derived class also can be treated as an object of its base class.
3. False，A Student class has an has-a relationship with the Faculty and Course classes.
4. True
5. True
